

FLEET MANAGEMENT SYSTEM FMS-CDR™

Inventure is one of the leading companies in the development of FMS-Standard compliant Fleet Management Systems. The basic configuration of the FMS-CDR™ system logs all fuel consumption relevant data, so the fleet owner can explicitly keep track of the fuel usage. The flexible system configuration enables the monitoring of any data in the FMS Standard. The system includes the PC software for data uploading into MS Excel™ format.

Basic Configuration*	Features
<ul style="list-style-type: none"> • Total Fuel Used, • Engine hour, • Total Distance (Tachograph km), • Fuel level, • Date and timestamp, • Data backward availability for months <p>* the configuration can be modified</p>	<ul style="list-style-type: none"> • Independent from the vehicle manufacturer, (Mercedes-Benz, DAF, MAN, Volvo, Iveco, Scania) • Reliable and incorruptible (the stored data can not be manipulated) • FMS Standard compatible, • Uploading to PC in MS Excel™ format, • Cost efficient (there are no operational cost).
Results	
	<ul style="list-style-type: none"> • The date and amount of fuel tank fillings, • Detection of fuel lifting, • Fuel consumption histogram, • Average vehicle speed, • Vehicle efficiency, • Engine fuel consumption over a time period or a certain distance.
