

# XL VISION™ PROFESSIONAL

**XL Vision™ Pro 4** is the latest generation of Inventure Automotive's brake system qualification software. Its outstanding features help You to work together with **XL Meter™ Pro** devices and also support You to accomplish your tasks as a forensic expert. The free version of the program (**XL Vision™ Standard**) enables basic level service brake evaluation and report printing while the professional one provides several evaluation types.

## XL Vision™ Professional 4.2 Main Features

- **Project based measurement handling:** Keep measurements taken from one vehicle in single project. It makes easier your work by simplifying the data record of measurement circumstances.
- **Professional service brake evaluation**
- **Installation of additional evaluation modules**
- **Remote control of XL Meter™:** Control your XLMeter Pro device from your computer, device mounted outside can be easily controlled from inside of car.
- **Synchronization from XL Meter™:** With synchronization the measurement results can be viewed immediately on your computer even before uploading the measurement data.

## Evaluation modules of XL Vision™ Professional 4.2

- **Professional Service Brake Module:** Professional Service Brake evaluation, MFDD calculation and service brake qualification, furthermore, determination of many parameters, e.g. the time of brake delay, lateral deviation, etc.
- **Acceleration Module:** Determine the acceleration rate of cars; with monitoring arbitrary set velocity, distance, and time ranges.
- **Retarder Module:** The ultimate examination and qualification tool for the endurance brake system (retarder) of trucks, buses, and ADR vehicles.
- **Tram Brake Evaluation:** Evaluation and qualification of tram brake.
